Strategically guiding your real estate portfolio to adjust in these trying times

1

Assessment

- What systems are currently in place?
- Do these systems need upgrades in order to better the operations of the organization?
- Analyze past, current, and future operating procedures: work from home, distance learning, layout de-densification, etc.
- Consider any changes made by the landlord if applicable

2

Solutions

- Prioritize your technology needs as they relate to your operating procedures
- Look for opportunities to augment existing technologies
- Consider minimizing touch points: contactless entrances, bathrooms, kitchen areas, etc.
- Find solutions to create long-term impacts for success

3

Implementation

- Work closely with IT department or consultants
- Allow time for testing and vetting to ensure successful operations on day one
- Understand the short and long-term impacts of these implementations

LEVERAGING TECHNOLOGY FOR THE LONG-TERM

New and augmented technology considerations will have both short and long-term effects for organizations. It is important to assess your organization's specific technological needs as they relate to your team's operating strategies and safety. By analyzing these needs the organization will see impacts that have long-term benefits.

Assessment

Analyze current infrastructure and operating procedures

Solutions

Prioritize solutions that meet the needs of your organization

Implementation

After testing and vetting, recognize how these changes will impact the organization and execute
